

What are the Canstar *Innovation Excellence Awards*?

Canstar Blue's *Innovation Excellence Awards* involve a sophisticated rating methodology, unique to Canstar, which compares submissions we receive from Telecommunications and Energy institutions throughout Australia. Canstar Blue's Innovation Excellence Award winners represent a selected group of innovative products within the Energy and Telecommunications industries over the most recent year which have all been reviewed, assessed and ranked.

What types of products are evaluated for the *Innovation Excellence Awards*?

The type of financial products Canstar evaluates includes the following examples:

- Phone plans
- NBN Products
- Energy products
- Renewable Energy

How is the *Innovation Excellence Awards* Calculated?

Degree of Innovation (40%)

The degree of innovation measures how unique and disruptive the innovation is within the current market. The 'WOW' factor is based on the judges' impression of the Innovation.

1. How new or different/unique?
2. How disruptive?
3. 'WOW' factor

Impact (60%)

The impact takes into account the breadth and depth an innovation has. The "breadth" of the innovation assesses how many consumers of the target segment are affected. It also evaluates the affordability of the product, and its ease of use. The "depth" of the innovation measures the impact the innovation will have on improving or affecting a consumer's daily life.

1. Breadth
2. Depth

A scoring system based on a rating from one to five is then placed against each of the above categories in relation to the correlation between the innovation and the categories.
